COLOR CLASSICS BY REVERE

Easy living. Handsomely detailed and value-priced, Driftwood II vinyl siding brings classic style to the forefront. The natural cedargrain texture and low-gloss finish of this quality-crafted exterior will impart casual elegance to any home.

ENDURING STYLE
Driftwood II's lasting beauty and simple upkeep make it a popular choice for today's homes. Durable and dent-resistant, each panel is solid vinyl color through and through, so it won't chip, flake and blister like painted surfaces. And unlike wood, it won't rot and warp due to moisture.

Even better is the fact that vinyl siding never needs to be painted. There's no need for dangerous ladders or time-consuming maintenance. Just an occasional rinse with your garden hose will remove most airborne dust and dirt. Your home will keep its attractive appearance year after year with very little upkeep.

ADDED STRENGTH
Take a closer look. Driftwood II is fortified with a rolled nail hem for extra-strong wall attachment. In independent tests simulating hurricane-force wind conditions, Driftwood II withstood windloads up to 176 mph.*

INVESTING IN TODAY AND TOMORROW

Having a beautiful home can be a wonderful source of pleasure and pride. It can also be a wise investment. Driftwood II vinyl siding not only will create an enjoyable, worry-free exterior, it will heighten your home's curb appeal as well. And in today's resale market, a beautiful, low-maintenance finish can greatly enhance the value of your home.

SIDING WITH PERFECTION
Perfection? It's never too much to ask. Our Color Clear Through® system makes it easy to find the perfect color match for your exterior design. This exclusive selection of customer-preferred colors ensures that all Revere products – siding, soffit, fascia, trim and rainware – will beautifully match throughout our vinyl, aluminum and steel product lines.

ENVIRONMENTALLY FRIENDLY

A sustainable material with a long service life, Revere vinyl siding provides both environmental and economical benefits. Vinyl siding's installed cost is typically lower than fiber cement, stucco, brick or stone and also has the advantage of simple upkeep. It never requires painting, staining or sealing and can be cleaned with mild soap and water, thus lowering maintenance costs and ensuring it does not release harmful solvents into the environment.¹

Vinyl siding also helps conserve natural resources often used for building materials, such as cedar and other wood, and is rated better than brick and fiber cement for overall environmental impact, according to Building for Environmental and Economic Sustainability (BEES) studies. Because of vinyl siding's modest energy use in manufacturing and reduced transportation impact due to its lighter weight, it contributes significantly less to global warming than many other siding products, including brick and fiber cement.¹

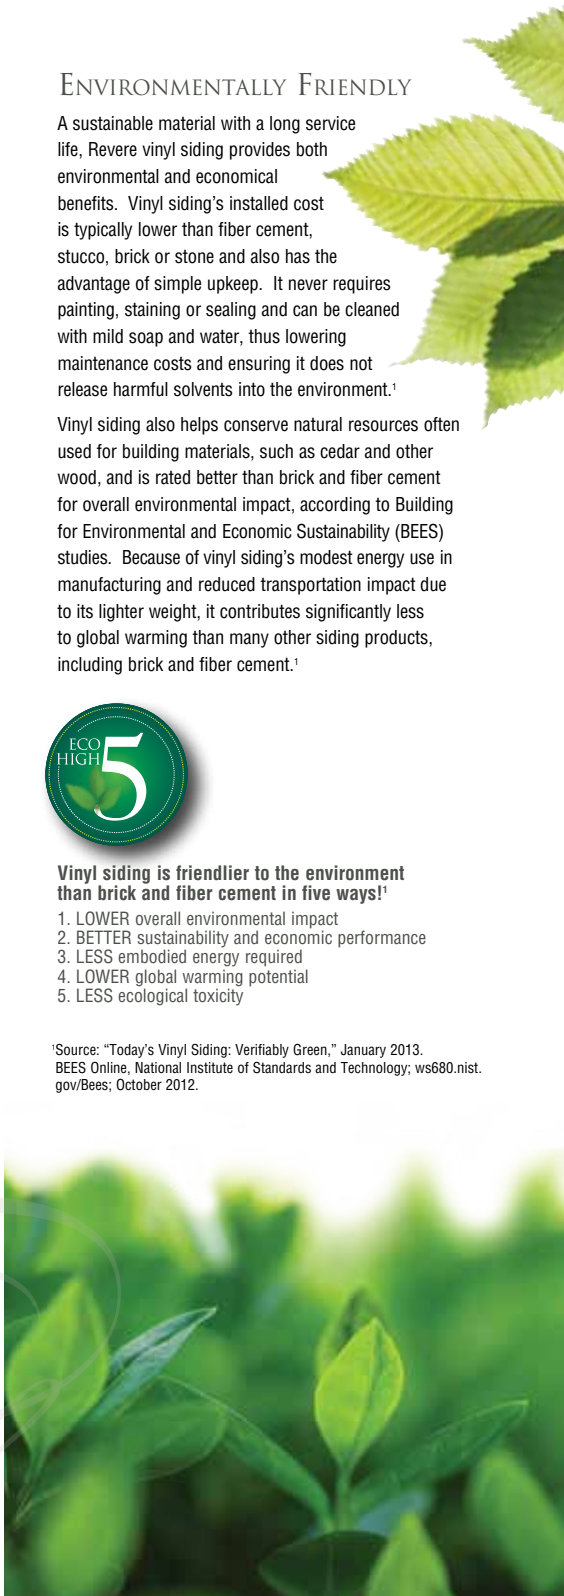

Vinyl siding is friendlier to the environment than brick and fiber cement in five ways!¹

1. LOWER overall environmental impact
2. BETTER sustainability and economic performance
3. LESS embodied energy required
4. LOWER global warming potential
5. LESS ecological toxicity

Our suite of classic profiles invites inspiration and visual appeal.

Warmth

PUT YOUR HOME IN OUR TRUSTED HANDS

Revere delivers the confidence and value only a true leader can provide. We proudly stand behind our products with the full faith of our more than 50 years of expertise and some of the strongest warranties in the industry. Our voluntary participation in rigorous certifications and independent testing are further assurance you have made an excellent selection for your home.

A LIFETIME OF PROTECTION

Driftwood II vinyl siding is backed by a lifetime limited, non-prorated, transferable warranty including lifetime fade and 50 year hail protection. For complete warranty information, including limitations, ask your dealer for a copy of the Driftwood II vinyl siding warranty.

INDEPENDENTLY TESTED AND CERTIFIED

As tested in an independent program sponsored by the Vinyl Siding Institute, Driftwood II vinyl siding has earned ASTM D3679 certification, the industry's highest standard for quality.

Pertains to Driftwood II vinyl siding.
Consult the VSI website at www.vinylsiding.org for a current list of certified products and colors.
